EPSON® Consumables and Paper Media

*Bringing out the best in your
EPSON printer*

- A comprehensive range of inks and paper media for home and business printing
- Formats to suit every application – the ultimate in EPSON PhotoReal® colour and laser-sharp text
- Total photographic solutions – colour images that are lightfast for more than 100 years†
- EPSON QuickDry™ Inks for instant, vivid colour every time
- Laser printer toner, drum and imaging cartridges

EPSON Stylus Inkjets – advanced imaging

Endless possibilities with EPSON

EPSON's comprehensive range of inkjet printers offers consistent, unbeatable 1440dpi PhotoReal® output. And when it comes to input, EPSON genuine consumables provide the high quality, flexibility and reliability to match. Only EPSON papers, inks and specialist media have been designed alongside the amazing technologies utilised by EPSON's unique PerfectPicture Imaging System™.

EPSON Stylus COLOR 680

For the ultimate in colour printing, your printer, inks and paper must work together in perfect harmony. EPSON ensures that every stage of the printing process includes innovative design, meticulous development, precision manufacture and rigorous quality control.

This perfect match between printer and consumables provides consistent performance and efficiency, and helps to ensure a long trouble-free working life for your printer.

EPSON Stylus inkjets enable home and business users to edit and print photos which are not only virtually indistinguishable from the real thing, but are amazingly flexible too – thanks to EPSON's comprehensive range of genuine consumables. Now every desk can become a true photo studio.

An ever increasing range of sizes, formats, weights and finishes are available, each designed to capture your imagination and bring all your fun and business ideas to life. From plain ink jet paper to full gloss professional photo quality media, and from business cards to Panoramic and even roll papers, there's no end to what can be achieved.

Take a look for yourself. It's never been simpler to revolutionise everything from your holiday snaps to business graphics, reports and presentations. And that's just the beginning – you can even create stickers, personalised greetings cards and iron-on transfers!

Expand your horizons and discover a whole new world of creative opportunities with EPSON.

(see back for full printer compatibility listing)

Introducing the latest developments in EPSON inkjet and consumables technology

Underlining EPSON's established position at the forefront of inkjet printing, the new generation of EPSON Stylus Photo printers showcase revolutionary breakthroughs in printer, ink and paper technologies which combine to produce photographic images which are lightfast for up to 100 years[†] and beyond...

EPSON's dedication to photo professionals is underlined by a level of image lightfastness and durability which no other manufacturer can match, offering digital photo prints with a life of 10 years* (EPSON Stylus Photo 870/875DC/1270) or even 100 years[†] (EPSON Stylus Photo 2000P).

Combining printer technology, reformulated QuickDry™ inks and EPSON special paper media, professionals and home users alike can now enjoy Photo Reproduction Quality images with unprecedented longevity – perfect for preserving precious images for generations.

EPSON Stylus Photo 2000P

The new EPSON papers have the look and feel of traditional photos, but are available in a range of finishes which traditionally require long, costly photo techniques. 10 year* lightfastness can be achieved on EPSON Premium Glossy Photo Paper or Matte Paper - Heavyweight, while four papers have been developed specially for the EPSON Stylus Photo 2000P, enabling a remarkable lightfastness of more than 100 years[†] – Glossy Paper – Photo Weight, Premium Semigloss Photo Paper, Archival Matte Paper and Watercolor Paper – Radiant White.

Many of these outstanding media are available in roll format (see full listing for details), which can be combined with a Roll Paper Holder to produce continuous, borderless and banner photo printing – the same results as a photo lab, without even leaving your desk. In fact, with the simple push of a button, you can print out an entire set of digital photos.

The Unique EPSON PerfectPicture

Quality Through Technology

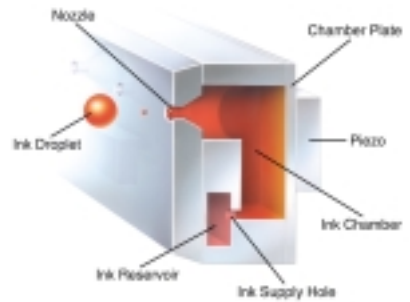

The EPSON PerfectPicture Imaging System™ is a combination of leading inkjet technologies which combine to produce the most complete colour printing solutions available.

At every stage, EPSON hardware, software, papers and inks are working together to provide the ultimate in performance, economy and ease of use – taking care of quality while you concentrate on setting your imagination free.

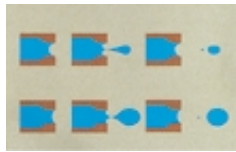

EPSON Micro Piezo™ Technology

Every EPSON Stylus inkjet features the unique EPSON Micro Piezo™ print head. This uses piezoelectric pulses to propel the ink onto the paper instead of heating it like other printers. This process controls ink dot shape, size and placement with such accuracy that 1440dpi resolution can be achieved even on plain paper.

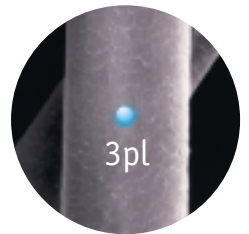

EPSON Micro Piezo™ Printhead

Micro Piezo™ printing allows dot size to be controlled

EPSON Variable-sized Droplet Technology

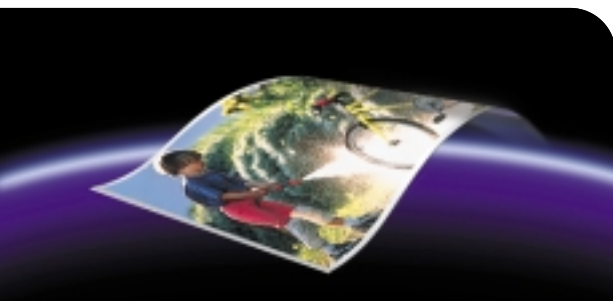

The EPSON Micro Piezo™ print head featured in many EPSON Stylus inkjets can produce a number of different ink dot sizes on a single line, including EPSON Super Micro Dots™ or even the virtually invisible EPSON Ultra Micro Dot™. By directing larger dots at areas of block colour and smaller ones at areas of detail, this ensures the ultimate in quality with the most efficient use of ink.

3pl Ultra Micro Dots – finer than a human hair

EPSON AcuPhoto™ Halftoning and Super MicroWeave™

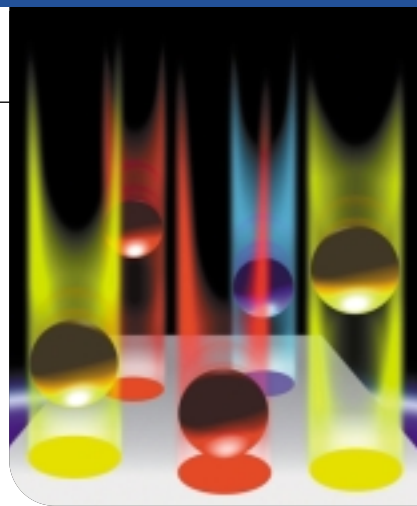

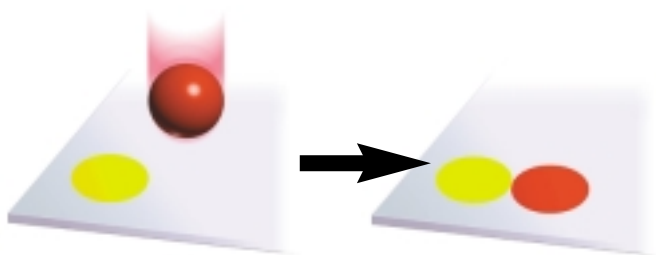

EPSON AcuPhoto™ Halftoning is an exclusive 32-bit image-processing system which enables variations in colour and texture of immense subtlety and detail. Combined with the fine, continuous tonal gradations made possible by EPSON Super MicroWeave™, outstanding image quality is achieved without compromising output speed.

PerfectPicture Imaging System™

EPSON QuickDry™ Inks

Providing the crucial link between printer and paper, EPSON QuickDry™ inks maintain their shape and direction, even at extremely high frequencies, and are dry and locked into place as soon as they hit the paper. The result is rich, PhotoReal® colour, with vivid, sharp detail and ultra-sharp text.

EPSON Photo Quality Papers

EPSON photo quality media are an essential part of the EPSON PerfectPicture Imaging System™. A truly comprehensive selection of specially formulated papers in an ever increasing range of sizes, formats and finishes are available. Every sheet, sticker and roll has been designed and manufactured to match the exact capabilities of EPSON's inkjet printers.

EPSON Intelligent Ink Cartridges – improved quality, state-of-the-art design

New EPSON Intellidge™ Ink Cartridges feature electronic, mechanical and chemical technologies that improve both print quality and functionality.

EPSON Intellidge™ Cartridges contain reformulated QuickDry™ inks which enable lightfastness in excess of 10 years*, and feature an integral IC memory chip that accurately tracks ink usage via your printer's on-screen Status Monitor. When the cartridge is less than 50% full, it will even tell the user how many pages capacity are remaining in both cartridges – based on the previous page printed.

They also include a reclosable valve which allows removal and replacement without any effect on ink quality. If, for example, there is not enough ink to complete a large print job, the partially used cartridge may be removed and replaced by a full one. When the partially used cartridge is put back into the printer, it will 'remember' ink levels precisely.

EPSON Ink Jet Paper

Versatile paper Media

The EPSON range of Ink Jet Papers has been designed to offer maximum value whilst optimising resolution for PhotoReal® quality. From printing higher volume reports, memos and newsletters to one-off glossy photos, covers and flyers, EPSON Ink Jet paper is the perfect solution.

Premium Ink Jet Plain Paper

Available in packs of 250 Sheets, this highly affordable uncoated media is the perfect accompaniment for the latest generation of Stylus inkjet printers. Enabling the user to print sharp text and brilliant colour graphics up to 1440dpi, the EPSON Premium Ink Jet Plain Paper is ideal for producing reports, memos, newsletters and even homework.

[A4](#)

360dpi Ink Jet Paper

This high value general purpose paper is designed to provide a pure white matte surface for colour printing and laser-sharp text. Available in packs of 100 sheets, except for A2 which is available in packs of 30 sheets.

[A4](#), [A3](#), [A3+](#), [A2](#)

Photo Quality Ink Jet Paper

Crisp, white paper offering 1440dpi PhotoReal® colour and a non reflective surface. Ideal for a wide range of general photo applications such as flyers and business graphics.

[A4](#), [A3](#), [A3+](#), [A2](#),

Photo Quality Ink Jet Cards

Available in a range of formats to suit situations where a more sturdy format is required. Applications include invitations, greetings and announcements.

[A6](#), [5x8](#), [8x10](#)

Photo Quality Ink Jet Greeting Cards

EPSON Photo Quality Ink Jet Cards are also available in pre-creased format with envelopes to match. Simply print your favourite photo and fold to create truly personalised greetings cards.

[A6 Note Cards with envelopes](#), [5x8 Greeting Cards with envelopes](#), [8x10 Greeting Cards with envelopes](#)

Photo Quality Banner Paper

A high quality matte paper, ideal for large format applications where a major impact is required. Party banners, shop announcements and BIG photo prints have never looked better.

[420mm x 15m roll \(requires banner paper kit holder\)*](#)

Photo Quality Glossy Paper

A brilliant white paper backed glossy paper for extra photographic gloss. Ideal for adding depth and colour to photographs and business presentations.

[A4](#), [A3](#), [A3+](#), [A2](#)

Photo Quality Glossy Film

This bright white film has an added gloss coating to bring out the best in your images. The shiny finish is truly striking, while PhotoReal® 1440dpi resolution maximises colour reproduction.

[A6](#), [A4](#), [A3](#), [A3+](#)

*Must be used with a banner paper kit holder. (As standard on Stylus Color 3000, optional on EPSON Stylus Color 1520). Banner software will be required.

Printed on Photo Quality Ink Jet Greeting Card

250 Sheet Pack

EPSON Photographic Media

PhotoReal® Quality as standard

This highly versatile paper enables professional photographers and photo enthusiasts to produce high resolution, glossy photo prints without costly, time consuming processing. A range of sizes and formats provide amazing flexibility while 1440dpi resolution ensures images which are at least as good as the real thing.

Printed on Photo
Paper Cards

Photo Paper

This outstanding heavyweight paper is the perfect surface for creating images of truly photographic quality, up to 1440dpi resolution and with smooth PhotoReal® colour every time.

4x6, A4, A3, A3+, 100 x 150, 200 x 300 (329x10m Roll for Stylus Photo 1200 & 1270 only)

Pre-scored Photo Paper

These Photo Paper sheets include pre-scored edges, which can be removed simply and effectively to create a borderless image which can be put straight into a photo album.

4" x 6"

Panoramic Photo Paper

For a wider appeal and maximum impact, this paper delivers 1440dpi quality images on a really grand scale. Perfect for landscapes group shots or photographers with a wider perspective.

A2 (210mm x 594mm)

Photo Paper Cards

These highly versatile sheets feature 8 pre-cut cards which can be used as a template for repeat prints on a single sheet. Perfect for short runs of personalised business cards, invitations, tickets or passes. EPSON dedicated software EPSON Print Adventure Card Edition has been developed to provide you with even more creative possibilities to make a unique impression.

A4

Photo Paper Roll

Specially designed for the EPSON Stylus Photo 1200 and 1270 inkjets, this flexible roll format Photo Paper provides a continuous supply of paper to suit just about any photo format.*

329 x 10m

* Requires optional roll media

EPSON Premium Glossy Photo Paper*

This brand new smooth, heavyweight paper is multi-coated to create the look and feel of conventional photographs. Combined with the outstanding capabilities of the new EPSON Stylus Photo 870 and EPSON Stylus Photo 1270 and 875DC, this paper produces photos which not only look even better than conventional photographs, they will continue to look good for at least 10 years*. Prints should be displayed in glass frames, in a plastic sleeve or properly stored (e.g. photo albums) to protect them from atmospheric contaminants.

A4, A3, A3+

EPSON Premium Glossy Photo Paper Roll*

EPSON's brand new 10 year* lightfast paper is also available in roll format, which can be used with the Roll Paper Holder (standard on the EPSON Stylus Photo 870/875DC, optional on the EPSON Stylus Photo 1270) to create continuous, borderless photos of just about any width, transforming your printer into a personal photo laboratory. Prints should be displayed in glass frames, in a plastic sleeve or properly stored (e.g. photo albums) to protect them from atmospheric contaminants.

100mm x 8m, 210mm x 10m, 329mm x 10m

EPSON Matte Paper – Heavyweight*

This heavyweight, bright white paper can also be combined with EPSON's three latest Stylus Photo Inkjets to provide photo quality images with a lightfastness in excess of 10 years*. However this paper has a non glare surface for maximum colour with minimal reflection. EPSON Matte Paper – Heavyweight may also be used with other selected EPSON printers (see compatibility listing for full details).

A4, A3, A3+

EPSON Glossy Paper – Photo Weight†

This paper-based, glossy media has been developed for use with EPSON QuickDry™ pigment inks – the colour gamut expressed is very wide, and as a result areas of detail, and especially dark areas, can be expressed extremely clearly. Many professionals who prefer media with a different texture to resin-coated papers will appreciate the softer texture of EPSON Glossy Paper – Photo Weight.

A4, A3, A3+

EPSON Premium Semigloss Photo Paper*†

This is a resin coated based paper that can be used with both pigment and dye-based EPSON inks. Increased thickness and weight achieves a real photo paper feel, which combined with the semi-gloss finished surface is ideal for wedding photos or outstanding scenic images.

A4, A3, A3+, 100mm x 8m roll, 210mm x 10m roll and 329mm x 10m roll

EPSON Archival Matte Paper†

Exclusively for pigment ink use, this paper-based media enables the printing of matte finished photos – a capability only possible with traditional photographic methods via some extremely complicated processes. EPSON Archival Matte Paper provides both a simple solution to this problem and an additional photo finish alternative.

A4, A3, A3+, 100mm x 8m roll

EPSON Watercolor Paper – Radiant White†

Exclusively for pigment ink, this matte paper has an uneven surface similar to that found on the watercolour paper used by artists. This is the ideal paper for artistic images and soft tone photos, and an inexpensive way of achieving the look and feel of fine art cotton paper.

A3+

Lightfast Test Criteria

Lightfastness rating of 10 years, developed and conducted by EPSON is based on accelerated testing of prints on speciality media, for indoor display mounted under glass. Actual print stability will vary according to image, display conditions, light intensity, humidity and atmospheric conditions. EPSON does not guarantee the longevity of prints. For maximum print life, display all prints under glass, in a plastic sleeve or in a photo album. Longevity of print does not cover colour stability or the durability of the paper itself.

* In excess of 10 years with Stylus Photo 870/875DC/1270
Lightfast Test Criteria (Indoor Display Condition)

Light source:	Fluorescent light
Intensity:	70k lux
Temperature:	24°C
Humidity:	60%
Glass mount:	2mm, without UV reduction
Fade criteria:	30% loss at OD=1
Display-life Calculation:	Total intensity/(500 lux x 10 hours x 365=1 year)

† In excess of 100 years with Stylus Photo 2000P
Lightfast Test Criteria (Indoor Display Condition)

Light source:	Fluorescent light
Intensity:	70k lux
Temperature:	24°C
Humidity:	60%
Glass mount:	2mm, Soda Lime
Fade criteria:	Pure YMC 30% loss at OD=1
Display-life Calculation:	Total intensity/(500 lux x 10 hours x 365=1 year)

* The data is calculated by EPSON's accelerated test and it does not mean EPSON guarantee periods. Tests developed and conducted by EPSON.

EPSON Creative Media

Endless Flexibility

For some projects, even EPSON papers and cards don't provide the unique finish you require. With this in mind, EPSON has designed a range of special media which take individuality and flexibility to new levels. We even offer special cleaning media to ensure that your printer is performing at its best, whatever your demands.

Photo Stickers

A simple way to bring lots of fun and creativity to printing. When used with the EPSON Print Adventure Sticker Edition dedicated software, you can cut and paste photos or text into a range of templates. Revolutionise labelling, business cards, invitations and much more, choose from 4 or 16 sticker sheets. [A6 sheet/16 stickers, A6 sheet/4 stickers](#)

Ink Jet Transparencies

These versatile transparent sheets can be used for printing PhotoReal® graphics and photos which can then be used to enhance presentations and lightbox displays. [A4](#)

Ink Jet Canvas Cloth Roll

A cloth material roll which acts like paper but provides a unique surface for photo prints. Adds a textured, artistic look to photographic images, and can even be backlit for extra impact.* [410mm x 3m](#)

Ink Jet Back Light Film

An opaque media which enables printing on the reverse side, for extra protection and a glossy finish. Images may then be illuminated from behind to create a three-dimensional effect. [A3, A2](#)

Photo Quality Self-Adhesive Paper

This paper offers all the quality of normal Photo Quality paper but has a self-adhesive backing. Simply print, peel and display your images just about anywhere. [A4](#)

Iron-on Cool Peel Transfer Paper

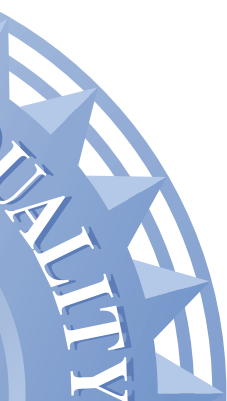

Your creations can be printed onto this transfer paper at up to 360dpi. Then they can be ironed-on to T-shirts, bags and just about anything cotton – the ultimate way to show off your photos or designs! [A4](#)

* Must be used with a banner paper kit holder. (As standard on Stylus COLOR 3000, optional on EPSON Stylus COLOR 1520).

Printed on Ink Jet Back Light Film, Iron-on-Cool Peel Transfer Paper, A4 Photo Quality Self-Adhesive Paper and A6 Photo Stickers (16)

EPSON Laser Printers

Performance and Precision

Laser printing performance is based around precision electronics and mechanics. This depends in turn on replaceable products of a similar standard, designed to provide consistent, high quality results.

EPSON's genuine consumable range includes toner and drum cartridges, collectors, filters, rolls and combination units, and a selection of paper media to bring out the best in the EPSON ColorPage laser series.

Consistently high standards of design and manufacture provide a perfect match which ensures uniform distribution of the toner and smooth movement of each sheet of paper through the printer – thus achieving truly outstanding results.

This level of harmony helps to provide consistently superior performance and a long, trouble-free working life for your printer.

(see laser printer products table for full listing)

EPSON ColorPage EPL-C8200

EPSON AcuLaser Technology

EPSON AcuLaser data processing technology is a collection of laser technologies that combine to provide fast, high quality monochrome and colour document production.

SPEED

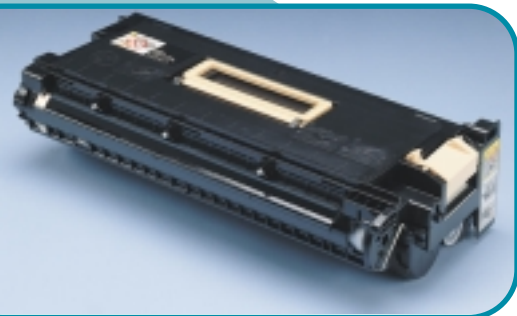

Rapid compression and data transfer, a range of interfaces and high performance RISC CPU ensure virtually instant printing with exceptional 'Dual RIP' and 'RIP Once' document sorting capabilities.

QUALITY

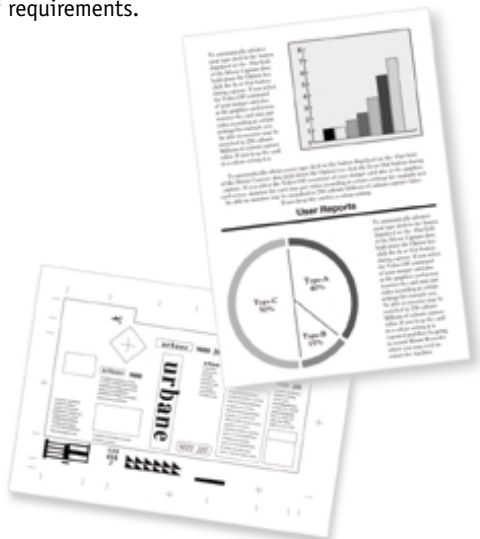

EPSON RITech (Resolution Improvement Technology) ensures crisp text and smooth graphics in both mono and colour documents, which is further enhanced by 'Fine Dot' halftoning and 'Multi-Screen' technologies to ensure optimum quality for documents which contain both text and graphics.

ECONOMY AND RELIABILITY

EPSON lasers offer remarkable value for money for such high performance machines. Efficient data management, rugged construction, exceptional build quality and highly flexible configurations provide the perfect high value printing solution to match your requirements.

EPL-N4000 Imaging Cartridge

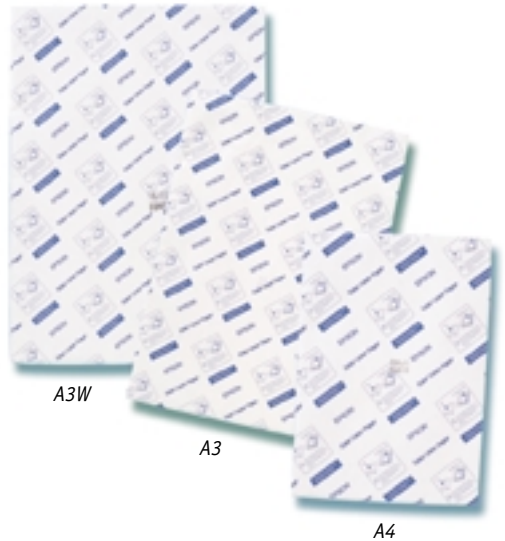

EPSON ColorPage Paper Media

EPSON Colour Laser Paper

A brilliant smooth white paper designed to optimise colour vibrancy, accuracy and sharpness, and to ensure uniform toner distribution. Works with EPSON AcuLaser Color Halftoning technology to produce perfect colour reproduction every time.

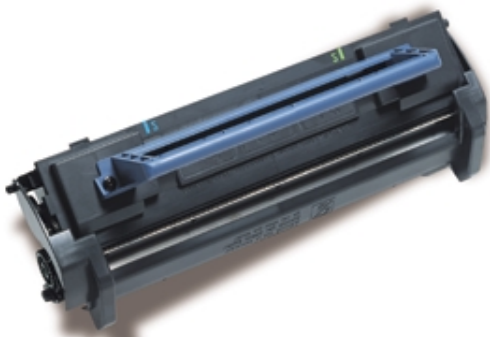

A4, A3, A3W

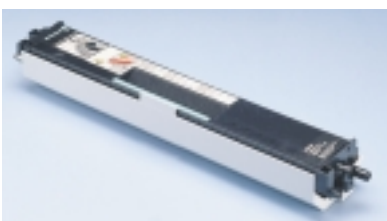

EPSON Colour Laser Transparencies

Offering all the performance of EPSON Colour laser paper, these transparencies enhance colour and detail to produce vivid overhead presentations and report covers.

EPSON Dot Matrix Printers and

Dot Matrix Consumables

The EPSON genuine consumables range includes quality ribbons for our dot matrix printers, each designed and manufactured with the same attention to detail and featuring the toughness required by demanding dot matrix printing environments.

EPSON dot matrix printers can handle everything from multi-part stationery, cut sheets and envelopes. Advanced models deliver paper feeds from up to 10 paper sources, enabling up to 5 different types of stationery to be held on call at any one time. With capabilities like this, you want to be sure that your consumables are up to the job – however demanding and complex.

Colour Ribbon Cartridge

EPSON Fabric Ribbons

Designed to a precise specification, EPSON Fabric Ribbons provide maximum durability for machines working under extreme conditions. Inside the cartridge, each ribbon is welded to form a continuous loop which ensures maximum strength whilst maintaining quality, while the ink is perfectly evenly distributed and contains lubricating oils to minimise print head wear.

EPSON Film Ribbons

These high-quality single pass plastic film ribbons, coated on one side with ink, provide letter quality output with clear, crisp lettering of precisely the right density.

Ribbon Cartridge

EPOS Products

Epson LQ-580 Dot Matrix Printer

EPSON Colour Ribbons

Colour printing subjects ribbons to rigorous vertical and sideways movement, so EPSON Colour ribbons are built tough to withstand continuous stress without bleed or smudging.

EPoS and Miniprinter Ribbons

EPSON manufacture a wide range of miniprinter ribbons for EPOS and the miniprinter range, with the latest edition of the TM range incorporating ink jet technology and a specially designed printhead. This comprehensive range of genuine consumables provide exceptional durability for economical operation keeping maintenance costs low.

Taking Care Of Your EPSON Photo Prints

OVER
10
YEARS
Lightfastness*

As with all photos, care should be taken to preserve the long life of your prints. All colour dyes change over time, but a few simple precautions will keep them in good condition for years to come.

Caring for your prints

Storing your prints in photo albums protects them from both airborne contaminants and light and assures them the longest life. We recommend using acid-free, archival sleeves that are commonly available from camera shops and other retailers.

If you're displaying your prints in picture frames, mount them under glass to minimize exposure to humidity, cigarette smoke, and other atmospheric contaminants.

Avoid placing them in direct sunlight or near sources of bright light. Your displayed prints will last longer when protected from the environment, but will not last as long as prints stored in photo albums.

IMPORTANT

Don't display or store your prints outdoors.

Don't store your prints where they are exposed to chemicals, such as in a darkroom.

Keep your unprotected prints away from sources of ozone, such as monitors and TV's, air cleaners or other sources of high voltage electricity.

If you're framing your photo, avoid doing so when humidity is high, as condensation may form behind the glass. If the humidity is too high, store your print in a photo album or plastic sleeve until the humidity drops.
