

Control from the Computer

Easy Web

Use your computer's Web browser to fully control multiple EMP-8300 projectors connected to the network. Make settings for various functions, and access the projector's menu items and functions found on the remote control.

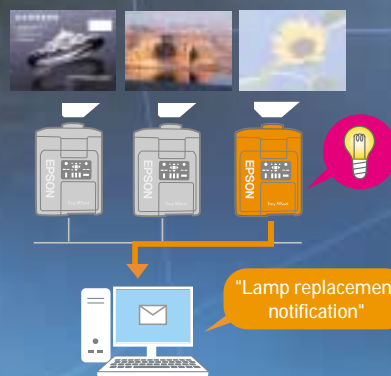

Network Screen

Project your computer screen from the EasyMP.net through a LAN connection. You can project up to four computers at once for a great multi-screen effect in large auditoriums.

E-mail Alert

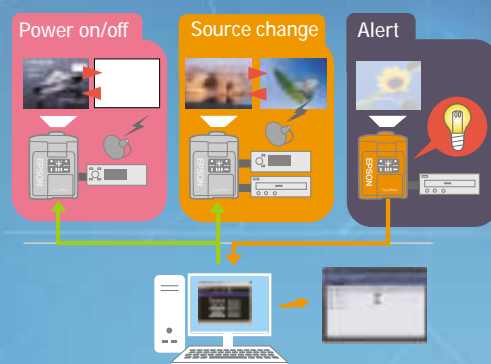

Automatic mail alerts for low lamp life, fan adjustments, temperature increases, etc.

"Lamp replacement notification"

EMP Monitor

Use your computer to manage and control projectors through the network. Once you install the necessary application included with your projector, you can use your computer to turn the projector on and off, and to select or change the projector's input source.

Network Module for EMP-8300

Easy MP.net

EPSON

The Simple Solution With The Most Powerful Network Projector

Easy MP.net

The Simple Solution With
The Most Powerful Network Projector

Control from the Projector

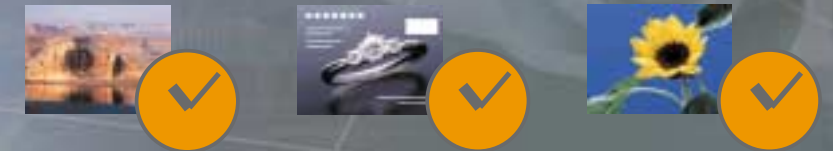

Easy Player

Enjoy a variety of media including MPEG-1, 2 and 4, WMV, RealVideo and image files, not to mention streaming broadcasts via the network.

Intelligent Timer

Offers comprehensive automatic control. For example, at a specified time have the projector turn on, project the screen of a connected source running a predetermined program, and then turn off – without you ever being there.

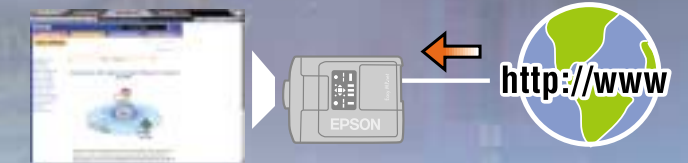

Easy File

Send data files to and from your computer through the network. Send your presentation data ahead of time and go to the meeting or class room with your hands free.

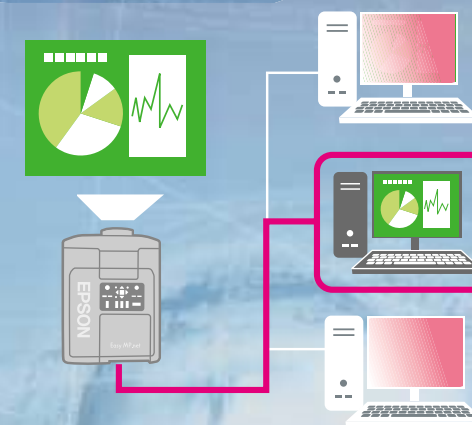

Easy Browser

Surf the Internet with just the EasyMP.net using Epson's own built-in Web browser. Packed with unique, convenient and easy-to-use functionality.

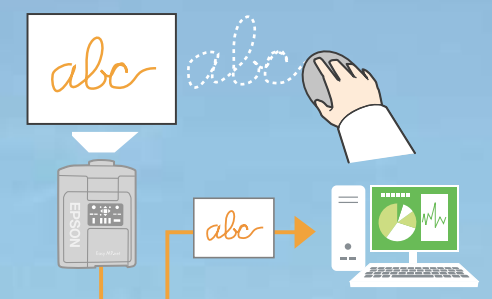

Remote Desktop

Remotely control your computer through the EasyMP.net via a LAN connection. Of course, you'll be enjoying it all on the big screen. The projector acts like a magic box that turns the big screen into a workspace for your remote computer.

Easy Board / Easy Marker

Turn the screen into a white board that you can write on at will. And mark up the screens of your presentation or other images as you see fit. You can also take a snapshot of any screen, automatically convert it to a data file and save it to a folder of your choice.

With Epson's innovative and easy-to-use EasyMP.net technology, the beauty is in its simplicity. Just add the EasyMP.net to the EMP-8300 projector & transform it into a powerful network projector. To add to its allure, the built-in computer within comes installed with Windows XP which allows a wide range of compatibility and the added bonus is that it is also upgradeable.

Because of its versatility, the EMP-8300 and its Easy MP.net module can project all kinds of media ranging from video to presentation spreadsheets, wirelessly or via a wired LAN system. Impressive is it's artificial intelligence module where users can easily monitor all EMP-8300 operations at one remote location AND it allows you to receive automatic e-mail alerts even before a problem arises.

Welcome to the future world of user-friendly projector engineering from the leader in projector technology; EPSON.

Ultra-Compact Computer

Inside this small EasyMP.net unit, you'll find a CPU, RAM memory, a hard disk and Windows XP Embedded. This allows you to install Windows XP applications and to use the projector just like a computer. Network capabilities let you use the projector to swap data files. You can also download and install the latest versions of your applications with the software updater to keep the projector up to date.
