

Fact sheet

HP Scanjet 4850 Photo Scanner

Overview

Get true-to-original reproductions at up to 4,800 x 9,600 dpi resolution with the HP Scanjet 4850 Photo Scanner. The scanner includes a built-in film scanner that scans up to four 35 mm slides or six 35mm negative frames, in a single scan session. Users can easily remove the appearance of dust and scratches, remove red-eye, restore faded color and automatically brighten photos using HP Real Life technologies.

Key Features and Benefits

- Leading resolution – 4,800 x 9,600 dpi and 48-bit color
- Built-in film scanner scans up to four 35 mm slides or six 35mm negative frames
- Simple, four-button panel for scanning documents and film, copying, and emailing
- Fast scan speeds – scan multiple photos into individual files in about 10 seconds per image
- One-touch button sends a scanned image or document to default printer through the computer
- HP Real Life technologies allow users to remove red-eye, brighten dark areas of an image, restore color, and remove the appearance of dust and scratches
- Adjustable lid for scanning 3D items to easily share or use in projects
- Included OCR software allows users to edit text from scanned documents

Additional Features

- HP Instant Share technology to e-mail hi-resolution images to friends and family without sending large file attachments
- New HP Image Zone 5.0 software allows users to edit, organize, print, share and archive digital photos

Technical Specifications

- Dimensions/Weight
